DETAILED ACTION

1. Information Disclosure Statement filed on 3/2/01 has been received.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1-2, 5,6 are rejected under 35 U.S.C. 102(e) as being anticipated by Fox et al (U. S. Patent no. 6,039,158).

Motor 72, clutch 76, gears 74, the clutch acts as a load sensor because it disengages when the proper load is set, release handle 112, manual set handle 54, chain 18

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3613

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fox et al. Fox et al is relied upon as above. Fox et al does not disclose the use of wireless communications as a means to set the brakes. It is well known in the brake industry to use wireless communications to control brakes. Examples include End of Train Devices. Therefore, It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a wireless setup in the system of Fox et al.

6. Claims 7-24 are allowed.

7. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
